

The disposable Skin Stapler by MeHoS makes suturing a quick, easy and safe process, helping the surgeon considerably and giving the patient a quick and pain-less healing.

Thanks to the staple automatic release system, the surgeon does not need to apply any pressure on the patient's skin, pressure that would make the removal of the staples painful.

The staples are built in medical grade stainless steel, and thanks to their biocompatibility, they can stay in place for a long time, giving the patient a quicker recovery.

Advantages

- Simple and intuitive use
- Highly biocompatible stainless steel staples
- Safety thanks to the return valve
- Staple automatic release system
- Non-stop recharge
- Less bleeding and less risk of cross-contamination
