GumDrop™ Pacifier

Finally, a pacifier that fits your baby's needs... without trimming!

- Same standard nipple shape babies love
- Special low-profile design allows for nasal cannulas
- Two sizes:
Newborn (Orange, Pink, Blue);
Premie (Green)
- Vanilla scent available – some babies and moms find it soothing!

LIGHTER WEIGHT THAN OTHER SILICONE PACIFIERS. GUMDROP STAYS IN BABIES' MOUTHS LONGER. LOW-PROFILE ACCOMMODATES NASAL TUBES, CANNULAS, AND SIDE LYING

Give your babies a taste of greater comfort and safety.

- Curved to fit baby's face.
- Single-body construction won't come apart.
- Soft silicone covers entire surface, so pacifier rests comfortably against baby's face.
- Meets Consumer Product Safety Commission standards for pacifiers.
- Approved for hospital and home use.
- The lowest profile pacifier – accommodates all CPAP and nasal cannulas.
- No need to cut-down or modify your pacifiers. (Cut-down pacifiers violate federal law.*)

Why GumDrop stays in babies' mouths longer:

- Lighter weight than other silicone pacifiers.
- Low profile and curved to fit baby's face.
- Slightly textured nipple.
- Nipple modeled after the most commonly used baby bottle nipple and pacifier shapes.

* TRIMMED SILICONE PACIFIERS FAIL PULL-THROUGH SAFETY TESTS REQUIRED BY AN AGENCY OF THE US GOVERNMENT (CONSUMER PRODUCT SAFETY COMMISSION PART 1511).

GumDrop™

GumDrop™ Pacifier The Perfect Fit – Without Trimming

GUMDROP'S SOFT, LOW-PROFILE DESIGN MEANS EVEN CPAP BABIES CAN ENJOY NON-NUTRITIVE SUCKING.

GumDrop is a safe, soft topped pacifier that's designed to fit your baby's face comfortably – even with nasal tubes and cannulas. And it's perfect for side-lying. Babies love GumDrop's low profile, curved shape and familiar nipple shape.

Special, Uni-Body Construction Won't Fold or Come Apart

GumDrop's uni-body construction means that the pacifier can't be disassembled and won't come apart. Its unique design involves a plastic guard that is completely over-molded with medical grade silicone. So GumDrop's surfaces are as soft as the nipple itself. GumDrop's open back lets you easily position and reposition the pacifier in the baby's mouth.

What breast-feeding moms are saying about GumDrop

"...I tried (another) pacifier at the hospital but it was too heavy... GumDrops are so easy for her to keep in her mouth. Plus the nipple is shaped like a mother's nipple... a big bonus since she's nursing." ~ NICHOLE'S MOM, WHITEFIELD, NH

"My daughter got this pacifier... in the NICU... Not only did it help her figure out nursing right away but it is an amazing soothing thing for her. I love it!" ~ AMY, CEDAR RAPIDS, IA

It's Easy for Parents to Buy GumDrops

Parents can buy GumDrop pacifiers directly at 1.800.396.1550 or online at gumdroppacifier.com. Or, sell GumDrop at your hospital gift shop or pharmacy.

Pacifiers may help reduce the risk of sudden infant death syndrome (SIDS)

American Academy of Pediatrics guidelines, published November 2005, recommend offering a pacifier at nap-time and bed-time throughout the first year of life¹. Introduce pacifier use in your hospital nursery with GumDrop.
