MiniMuffs®

Neonatal Noise Attenuators

For those little ones in need of some peace and quiet...

Designed specifically for premature babies, MiniMuffs noise attenuators protect their sensitive ears, and provide a safe environment for healthy development

Provides a "quiet hour" for premature babies in the NICU

- Helps meet American Academy of Pediatrics guidelines for safe noise levels in the NICU[1]
- Reduces sound levels by at least 7 decibels (dB)[1]
- Results in a reduction of sound pressure level of more than 50%[1]

Ideal during special patient care procedures and transport

- Protects the sensitive ears of babies under ventilation
- Decreases the MRI noise levels when used in conjunction with earplugs[1]
- Reduces disruptive noise associated with transfer of infants to different hospital units and provides quieter environment during transport in emergency vehicles

Safe and comfortable

- Fits comfortably around the baby's ears with a soft foam oval-shaped design and gentle hydrogel adhesive
- Meets infection control standards through single-patient use design

Reduced noise levels are clinically demonstrated to positively impact infant state[1]. By reducing noise levels, MiniMuffs noise attenuators result in potentially longer periods of sleep time, optimal oxygenation and improved physiological stability.

The MiniMuffs neonatal noise attenuators pack includes:

- 36 individually wrapped pairs
- Complete Instructions for Use

Specifications

Nominal Dimensions		
Inner width:	1.125 in.	2.856 cm
Inner length:	1.375 in.	3.493 cm
Inner height:	0.31 in.	0.787 cm
