

**Get Advanced Results  
with EasyOne Pro**  
The experts' choice

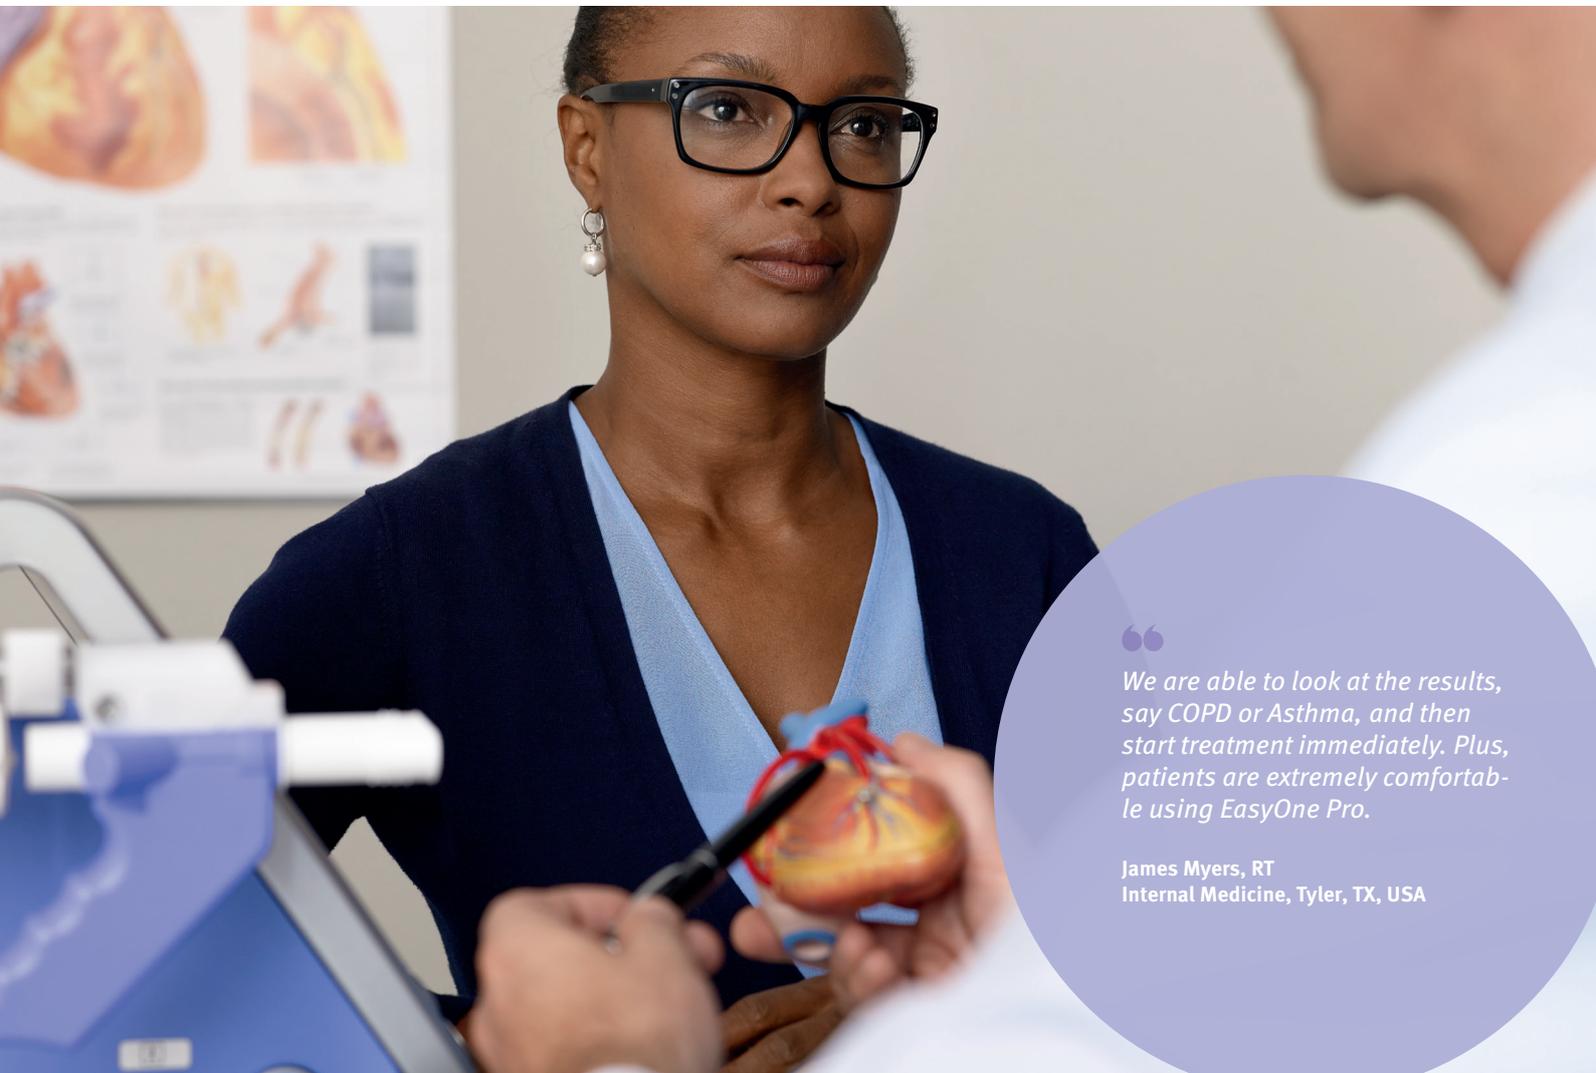

## Is it Asthma or COPD?

- Identify and differentiate patients with Asthma, Emphysema, ILD, Pneumonitis, neuromuscular and pulmonary-vascular disorders
- Monitor patients with heart and lung diseases that impact lung function
- Monitor patients undergoing treatment with drugs such as anti-arrhythmics and cancer chemotherapy

## Perform DLCO tests anywhere, anytime

EasyOne Pro offers the smallest footprint on the market, is portable and requires no warm up time. It combines our **n dd TrueFlow** and **n dd MolMass** technology, i.e. **removing calibration** as a source of error and **no maintenance**.

That's why it's easy

“

*We are able to look at the results, say COPD or Asthma, and then start treatment immediately. Plus, patients are extremely comfortable using EasyOne Pro.*
